\$12.95

Pick of the Week

Secret History of the War on Cancer Devra Davis (tp) \$22.00

Davis, a member of the team awarded the 2007 Nobel Peace Prize, has written what many consider the most important science book in decades. She acknowledges the work of many earlier writers including Rachel Carson that aided her research & helped expose the concerted attempts by government agencies & private corporations to keep the public from realizing the full extent of the dangers of known carcinogens in their environments. A troubling & uncomfortable work twenty years in the making that presents a blend of history, science, politics & medicine that is truly shocking in its revelations.
